Problem Statement:

Busy College Students need to find the best time to go to the gym so they can exercise and leave quickly and not have to wait for equipment and due to there classes being throughout the day.

What is the problem?

There are two on campus gyms for students to exercise at. However, these gyms seem to be constantly packed no matter when you go. Our solution should provide a way to see how many people are in the gyms at any given time.

Who is experiencing the problem?

The students at UofSC are experiencing this problem.

Where does the problem present itself?

The problem presents itself at the two on campus gyms that students have access to.

Why does it matter?

It can lead to a lack of motivation to go to the gym when you feel like it will be too packed to get a good workout in.
